

include/common/rounding
_modes.h

```
graph TD; A[include/common/rounding_modes.h] --> B[unordered_map]; A --> C[stdexcept]; A --> D[string];
```

A diagram illustrating the dependencies of the header file `include/common/rounding_modes.h`. Three blue arrows point from the header file box to three separate boxes below it: `unordered_map`, `stdexcept`, and `string`.
